Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. 6948479 to **Raney et al**

The patent to **Raney et al.** discloses a noise damper including a resilient hose member (12), which is radially surrounded by housing (32) and with a damping element (28) water-tightly incorporated radially between the housing and the hose member, wherein a form stable, two part enclosure (30) enclosing the damping element is inserted with a positive fit in the housing. The housing is not disclosed as being separable, however it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the housing in multiple, separable parts, since it has been held that constructing a formerly integral structure in various elements involves only routine skill in the art.

Allowable Subject Matter

2. Claims 2-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Amendment

3. Applicant points out that the **Raney et al.** reference is not prior art since the application has priority to September 2002. Therefore the previous rejection has been withdrawn. The **Byrd, Jr. et al.** reference, however, similarly discloses the recited structure including the housing, the tubing within the housing and the resilient material between the tubing and the housing. Also disclosed is the two part enclosure to keep the resilient member within the housing.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Patrick F. Brinson** whose telephone number is (571) 272-4897. The examiner can normally be reached on M-F 7:30-3:00.
